

From Behind the Service Counter

We'll we've finished the move and the store looks great. After accumulating 20 years of 'stuff' it's been more than just a cleansing experience to get reorganized. We've thrown a lot of 'stuff' away too which as a habitual hoarder (if you've been in the store anytime in the last ten years you know what I mean) has broken my heart but the exhilaration of starting anew far out ways the regret of letting some things go.

The new store is physically just a bit smaller than the previous location but the box configuration is so much more efficient, even though it looks so much smaller.

Knowing what we want to do and how we want to do it has crystallized our focus and the layout is bigger and more inviting.

We are also introducing a new service to the area... a Small Home/Business Center for faxing, colour laser printing, photocopying, binding, shrink wrapping, small sign making, etc. Drop by soon and check us out. We'd be happy to help you get that perfect look for your report or presentation.

Our new service center is ready to provide fast service. We can now turn most repairs or virus cleanings in the same or next day. Keith is already hard at work and really happy with his new digs.

With lots of free parking, our new location is a welcome breath of fresh air. Drop by soon and check us out!
